SUMMARY

Computer Science and Engineering graduate and full-stack developer who builds web and mobile applications with React, React Native, Node.js, Express.js, and MySQL. Most recently co-taught two 4-week Build With AI cohorts at Digital School, guiding 60 students aged 8–18 through prompt engineering, AI ethics, and AI-powered projects. Combines full-stack engineering, practical AI fluency, and a visual design background to ship clear, user-focused products.

EXPERIENCE

Digital School (Shkolla Digjitale)

Teaching Assistant

Prishtina, Kosovo

July 2026 – Present

- Co-delivered two 4-week cohorts of the Build With AI Summer School, July (ages 8–11) and August (ages 12–18), reaching 60 students.
- Guided students through hands-on work with AI tools including ChatGPT, Canva AI, Pictory AI, Visily AI, Lovable, and Craiyon.
- Taught prompt engineering, AI ethics, and creative AI applications through workshops adapted for two age groups.
- Mentored students in building AI-powered projects from initial concept to finished work.

Tectigon Academy

Full Stack Developer Intern

Prishtina, Kosovo

August 2025 – October 2025

- Developed responsive full-stack web applications from planning through deployment in an agile team environment.
- Built modern, user-friendly front-end interfaces with React.
- Implemented REST APIs and MySQL database integration with Node.js and Express.js.
- Debugged, tested, and optimized application code to improve reliability and performance.
- Managed code with Git and applied version-control best practices alongside mentors and peers.

Adliens Agency

Graphic Design & Social Media Intern

Prishtina, Kosovo

July 2024 – October 2024

- Designed social media posts, banners, and marketing visuals for client campaigns.
- Developed branding concepts and campaign materials in collaboration with the marketing team.
- Planned and scheduled content across social media platforms to support engagement strategies.
- Researched design trends and optimized graphics for multiple digital formats.

EDUCATION

UBT – University for Business and Technology

Bachelor of Computer Science and Engineering

Prishtina, Kosovo

2023 – 2026

- Studied software engineering, web and mobile development, databases, and artificial intelligence.
- Built full-stack web and mobile applications with React, React Native, Node.js, Express.js, and MySQL through practical projects.
- Led and managed multiple group projects using Agile methodology: planned work in sprints, defined requirements, delegated and tracked tasks, ran regular team check-ins, and delivered projects on schedule.
- Complemented coursework with independent research and certifications in full-stack development, DevOps, and AI.

SKILLS & CERTIFICATIONS

Technologies: React, React Native, Node.js, Express.js, MySQL, REST APIs, Git

Development: Full-Stack, Front-End, Back-End, and Mobile App Development; Database Management; DevOps

AI: Artificial Intelligence, Prompt Engineering, ChatGPT, Lovable, Canva AI, Visily AI, Pictory AI

Professional: Project Management (Agile), Team Leadership, Problem Solving, Teamwork, Communication, Teaching & Mentoring

Certifications: AI-Powered Higher Education (Arizona State University, Coursera); AI Fluency: Framework & Foundations (Anthropic); Full Stack Programming (Tectigon Academy); Responsive Web Design (freeCodeCamp); React Native, Backend Development, DevOps Specialist (Digital School)

Languages: Albanian (Fluent), English (C1), German (A2), Italian (A1)
